SHUBHAM DANI

SKILLS

Mobile Technologies

Android Application Development ·
Android SDK · Jetpack Navigation ·
Jetpack compose · Dagger / Hilt ·
Data Binding · View Binding · App Bundle ·
Code obfuscation · Application Security ·
Key Store Management · Unit Testing ·
KtLint · Detekt · SSL Pinning ·
Single Activity Architecture · Deep linking ·
Kover/Jacoco

Architectures

MVVM · MVP · MVI · Clean Architecture

Language

Kotlin · Kotlin - Coroutine · Flows ·
Functional Programming · Kotlin DSL

Integrations

REST API integrations · Code Review ·
Leak Canary · Sonar Qube · App center ·
Veracode Scanning · Retrofit ·
Google Maps · Firebase · Arxan ·
Dynatrace

CI-CD

Github Actions · Jenkins

Version Control System

Git · Github · Bitbucket · Gitlab

Miscellaneous

Kotlin Multiplatform (KMM) · Springboot ·
Groovy · Solid design principle ·
Design Pattern

Senior Android Engineer

SUMMARY

As a passionate Android engineer with 8 years of experience developing high-end Android applications, I have demonstrated expertise in Kotlin and Java programming languages for developing robust and scalable software products. Proficient in adapting and analyzing information system needs, I evaluate end-user requirements and custom design solutions for complex information systems management.

EXPERIENCE

Senior Android Engineer
IBM / Scottish Widows

10/2022 - Present
United Kingdom

Responsibility
- Migrated Android Application User interface to Jetpack compose.
- Increase pipeline performance by reducing build time to 40% on Github Actions pipelines.
- Collaborated with developers and QA engineers to ensure the smooth migration of CI/CD pipelines to GitHub Actions.
- Developing features in the fast growing application.
- Monitoring and fixing production issues.
- Adapting Kotlin as the gradle language and converting existing groovy build scripts.

Senior Android Engineer
IBM

01/2021 - Present
India

Responsibility
- Collaborated with cross-functional teams to translate business requirements into technical solutions and ensured the timely delivery of high-quality software products.
- Implemented MVVM Clean Architecture in the development of Android applications, leveraging Dagger2 and RxJava for efficient and scalable code.
- Demonstrated a high level of understanding of SOLID principles, design patterns, and software architecture concerns in the development of software products.
- Worked with team of 4 members to provide end-to-end solutions.

Senior Android Engineer
Globant

09/2017 - 12/2020
India

Responsibility
- Managed team of 2 people.
- Worked with team of 4 members to provide end-to-end solutions.
- Adept at identifying system software security risks, and proactively developing solutions to mitigate these risks, resulting in robust and secure software products.
- Utilised architectural patterns and design principles to create scalable and maintainable software systems that meet business requirements.

Android Developer
Webonise

06/2015 - 09/2017
India

Responsibility
- Work collaboratively with team members with good knowledge of API development experience in programming with external API services including XML / JSON.
- Understanding to translate design concepts into effective and user-friendly app screens that align with business requirements and user needs, resulting in high-quality and visually appealing software products.

EDUCATION

Computer Science Engineer
RGPV University - India

2011 - 2015

LANGUAGES

English   Proficient   ●●●●○
